TAKE ON STRUCTURE FIRES, WILDLAND FIRES, AUTOMOBILE AND MEDIUM CLASS B SPILLS.

Husky 12 Capacities

Foam Concentrate %	0.3%	0.5%	1%	3%	6%
Husky 12 GPM (L/min)	4,000* (15,142)*	2,400* (9,085)*	1,200* (4,542)*	400 (1,514)	200 (757)

*Maximum flow depends on maximum water pump and plumbing capacities.

Features

- Single or dual tank system.
- The Husky™ 12 is designed to pump any Class A or Class B foam, even high-viscosity, alcohol-resistant Class B foams.
- Hydraulic drive powered to avoid heavy amp draw loads on the chassis electrical system (less than 5 amp).
- Single point, direct injection, flow based system using digital technology to indicate pump position & a flow meter.
- A 12 gpm foam pump provides capacity to handle structure, wildland, & automotive fires, as well as medium Class B spills.
- The system uses patented flow meter-based technology & is highly accurate over a wide range of pressures from 75 psi to 250 psi.
- The system is easy to operate, with just a 1-button operation required to create foam.
- 4.30" digital LCD screen that displays foam flow, water flow, foam percentage, foam used, water used, maintenance reminders, & diagnostics. The LCD screen also allows you to adjust pre-set foam percentages, calibrations, & foam tank defaults (on dual tank systems).
- Foam percentage is easily adjustable. Class A percentages are adjustable from 0.1 to 1 percent & Class B percentages are adjustable from 1 to 6 percent.
- Built-in flush system eliminates need to pick up clear water to flush the system.
- Auxiliary foam pickup allows use of another foam that is not stored in the foam tank &/or continued foam operation when foam is depleted out of the tank.
- A foam tank refill system is available to fill the foam tank(s) from the ground.
