

# 100' ALUMINUM AERIAL PLATFORM

# REACH HIGH. REACH LOW. EVEN AT EXTENDED ANGLES.

Reserved for those who demand the ultimate in below grade operation and setup adaptability, the Pierce® rear-mount 100' aluminum platform lets you access the basket without extending the device. It has an impressive rotation of 235 degrees at -11.5 degrees below ground level. With greater sweep capabilities, precise control from Pierce Command Zone™ advanced electronics, and overall maneuverability, Pierce rear-mount aluminum platforms simplify getting to the scene and back again.

The Pierce aluminum platform basket features an ergonomic design for easier access and operation with angled doors, an 8" walkway on the sides, and moveable controls. The basket is available with single or dual monitors and a full complement of Lyfeline™ exclusive accessories mounted on the front side of the basket, thus freeing space inside.
